

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	12 July 2026
Team ID	Vasundhara361@gmail.com
Project Name	Credit Card Approval Prediction Using Machine Learning
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Applicant Data Entry	Enter applicant details through web form (Age, Income, Credit Score, etc.)
FR-2	Data Validation	Validate user inputs before prediction
FR-3	Credit Approval Prediction	Predict whether the credit card application is Approved or Rejected using the trained ML model
FR-4	Display Result	Display prediction result to the user instantly

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	User-friendly web interface with simple input form
NFR-2	Security	Protect user input and ensure secure data handling
NFR-3	Reliability	Generate accurate and consistent predictions
NFR-4	Performance	Prediction should be generated within a few seconds
NFR-5	Availability	Application should be available whenever users access it
NFR-6	Scalability	System should support additional users and future enhancements
